jonnymartin.blog

Concord, CA

Senior Product Manager with 15+ years shipping consumer products at scale across gaming, consumer platforms, and enterprise mobile. Deep expertise in growth, live ops, monetization, and go-to-market strategy at companies including Zynga, Jam City, Genies, and AAA. Currently co-founding a game studio and building with AI-native workflows — recently shipped a production app solo from zero to 150 early access members using modern AI tooling, combining product strategy with hands-on full-stack development.

EXPERIENCE

Co-Founder & Director of Product | Frame Story

Feb 2025 – Present

- Co-founded a collaborative game studio; led business formation end-to-end including LLC, banking, payments, contributor agreements, and IP assignment.
- Built 5-year financial model and investor materials: \$3M cap SAFE, 1-to-12 title portfolio strategy.
- Designed phased GTM for debut title (Cluck): Steam Next Fest, indie festivals, creator partnerships, and Kickstarter.
- Executing \$100K pre-seed raise via SAFEs, grants (Epic MegaGrant, Wings Fund), and crowdfunding.
- Leading product on Cluck (3D platformer) with a 10+ person team through milestone-driven Steam release.

Founder / PM / Dev | Indie Builder — Pottery Friends

Feb 2025 – Present

- Running a structured early access beta with 150 members: tracking D1/D7 retention cohorts, activation funnels, and PMF surveys to validate purpose-built studio software for craft communities.
- Built the full product ecosystem solo using AI-assisted development (Claude Code): native mobile app, marketing site, analytics dashboards, and internal docs — shipping production features in days, not sprints.
- Prioritized ruthlessly: cut a planned marketplace after user interviews, pivoted the home screen when engagement data contradicted the hypothesis, reduced 40 onboarding quests to 8 tied to real studio actions.
- 15+ repos, 59 migrations, 19 edge functions across React Native, Next.js, Supabase, Stripe, and PostHog — one PM with modern AI tooling replacing a small product team.

Senior Product Manager | Treasure DAO

Apr 2024 – Nov 2024

- Launched Quest v2 and Verified Actions, increasing user engagement by 30% and reducing data integration time by 40%.
- Defined 2024 roadmap; improved team delivery velocity by 25%.
- Led the launch of a new chain on Arbitrum, expanding user base by 20% and boosting transaction speeds by 50%.
- Shipped refactored web app, gaming marketplace, testnet, and developer portal, increasing active developers by 35%.

Senior Technical Product Manager | Mythical Games

May 2022 – Dec 2023

- Shipped a cross-title game services platform that unified engagement and monetization. Player retention up 20%, revenue up 15%.
- Led a cross-functional team to deliver digital asset marketplace on time and under budget, opening a new revenue stream across multiple titles.
- Defined the game services roadmap by identifying gaps competitors missed: live ops tooling, unified player identity, and cross-title progression.

Founding Product Manager | Genies

Feb 2021 – May 2022

- Built the Creator Ecosystem from concept to launch — the product story that helped secure \$150M in funding with partners like Gucci and GIPHY.
- Launched e-commerce storefront generating \$100K in weekly sales; shipped mobile app with GIPHY integration, scaling to 3K early users.
- Defined GTM strategy that grew alpha community to 1K users.

Digital Product Manager | AAA (American Automobile Association)

Mar 2018 – Aug 2020

- Launched an API-driven mobile app to 6M members with real-time vehicle tracking, saving \$2M/year in call center costs by shifting support to self-service.
- Owned product strategy end-to-end with weekly C-Suite and VP presentations — the only PM reporting directly to executive leadership.
- Ran competitive analysis, focus groups, and multivariate tests that drove a 30% improvement in onboarding completion.

Product Manager | Big Fish Games

Mar 2017 – Oct 2017

- Built the analytics pipeline from scratch (ETL + Tableau), giving the team its first real-time view of player behavior and monetization.
- Ran multivariate tests on onboarding and core loop. Engagement up 20%, session length up 50%.

Product Manager | Bandai Namco Entertainment

Aug 2016 – Mar 2017

- Ran product operations for the PAC-MAN franchise: 10M+ weekly installs, 1M+ MAU at global launch.
- Pivoted acquisition from organic to paid after analyzing cohort data. Retention improved 20% because paid users had higher intent.

Director of Product | Flow State Media

Nov 2015 – Aug 2016

- Owned product strategy for a suite of mobile games; content and monetization optimizations drove 8 consecutive months of revenue growth.

Product Manager | SUPERLABS (acquired by Zynga)

Mar 2015 – Sep 2015

- Led pre-production product definition for a VR game; competitive research across VR, open-world, and MMO genres shaped the design direction.

Product Manager | Jam City

Aug 2013 – Mar 2015

- Launched and scaled product to 1M+ DAU. Grew it into a \$50M title by refining content, design, and monetization.
- Drove 20% MoM revenue growth through in-game economy optimizations and content production.

Content Manager | Zynga

Jun 2009 – Apr 2013

- Shipped features across 4 franchises (FarmVille, FrontierVille, Treasure Isle, PetVille) during Zynga's peak growth era.
- Built Zynga's first mobile raiding feature (Mafia Wars iPhone) — an early bet on mobile that shaped the company's platform shift.
